

Dear Honorable Members of Congress and representatives of the FCC. Please allow our country and it's citizens to benefit from new technologies such as satellite radio. Often times local stations are unavailable due to local interference or terrain. Satellite radio is available in these areas in crystal clear digital reception and keeps my family and I safe in times of severe weather or dangerous traffic conditions. Please place the value of the people ahead of the powerful lobbyists from wealthy radio and television owners. Luckily our representatives in the past saw clearly enough not to forget the people they serve. This is why we have television and FM radio today. I fully support the efforts and positions of the satellite radio business. Thank you for considering my comments.

Ron Cox
